

NOWAR Velcro Handcuffs

The handcuff made of velcro is of our own production. It consists of an 120 cm long and depending on achievement 2 or 3 cm wide hook-and-loop tape which avoid the cutting in the wrists. It is robust, useable for several times and washable. As no metalliferous material is included, this handcuff is especially suitable for forensic clinics. An other advantage of our product is the compact measurement and the low weight.
