

## PROTEK Body Protection Equipment – Leg Protector Standard

We developed the PROTEK protection equipment, one of the element of it is leg protector shown in the pictures, for warding off attacks and to dull their effect against law enforcement authorities. The pressed foam lined hit resistant ribbed plastic conducts and reduces the power of dull hits almost completely. In spite of its high level of protection the equipment ensures free movement for the wearer (running, marching, riding a horse, etc.). The leg protector can be purchased separately but also available with a foot protector too. It can be excellently used during disperse, fighting in the crowd and other armed force interventions.

Also available are different bags for storing the Body Protection Equipment.
