

PROTEK Body Protection Equipment – Body Protector

Our product provides perfect protection for the staff's upper body of law enforcement units from non ballistic attacks. The equipment's ribbed and pressed foam lined finish effectively absorb the power of hits (e.g. hand, stick, etc.) or flying objects (e.g. stone, wood, pieces of brick, etc.). We added an other element to the equipment for protecting swinging ribs and kidneys. During its development besides full protection we had the freedom of movement in sight. The equipment can be worn above or under clothing according to the user's needs.
