

ESS Profile TurboFan™

Already the preferred fan goggle of US Special Forces groups, the ESS Profile TurboFan™ is now better and tougher than ever. This improved fog-elimination system features the robust PowerPod™ battery pack with a push-button switch, now positioned near the back of the head of snag-free operation. A single AA battery powers the two-speed fan system for up to 150 hours of continuous operation, exhausting humidity to prevent lens fogging. The goggle frame is a variation of the ESS Profile NVG™ with extra face padding.

Includes: Two 2.8 mm polycarbonate high-impact lenses (Clear & Smoke Grey), an anti-reflective SpeedSleeve™ and a protective soft case.

Anti-fog System	<ul style="list-style-type: none"> - Patented TurboFan™ eliminates fogging by drawing filtered, fresh air in from the bottom of the goggle and forcing humid air out the top at up to 13,000 rpm - This 2-Speed fan can be set at High for maximum exhaust, or Low for silent operation
Lenses	- Clear and Smoke Grey 2.8 mm polycarbonate high-impact lenses included (Hi-Def Yellow available)
Strap System	- 35 mm-wide, high-memory elastic strap system features quick-adjust slides ESS Outrigger™ Strap System offers the best comfort and tightest seal to the face when worn with a combat helmet
Frame	<ul style="list-style-type: none"> - Low-profile design compatible with night vision system - Wide frame design provides an exceptionally broad field of view - Closed-cell face padding is durable, easy to clean and comfortable for use over long periods
Article-No.	<ul style="list-style-type: none"> - 2701301 Profile TurboFan (Black) - 2701302 Profile TurboFan (Desert Tan) - 2701303 Profile TurboFan (Foliage Green)
