

ESS Advancer V-12™

The ESS Advancer V-12™ goggle is a revolution in functional eye protection. Equipped with the patented ESS Adjustable Ventilation System™ (AVS™), the lenses click open and closed to regulate ventilation, increasing or decreasing airflow on the move. For the first time ever, a goggle can adapt to its environment with a simple click of the lenses.

AVS™ Technology: to eliminate lens fogging, “advancing” lenses click forward for maximum airflow. To seal out sand, dust and debris, the lenses snap closed for maximum filtration.

Sidewinder™ Strap Outriggers: The patented SideWinder™ Strap Outriggers pivot forward to position the strap for maximum compatibility with helmets and to ensure that the goggle seals comfortably to the face.

Features

- Patented AVS™ design regulates airflow & filtration on the move
- Lightweight, low-profile design is compatible with night vision systems and ideal for weapons sighting
- SideWinder™ Strap Outriggers provide optimal helmet compatibility
- 19mm-wide, high-memory elastic strap features quick-adjust slides
- Advanced ClearZone FC™ anti-fog and anti-scratch lens coatings
- 2.8 mm impact-resistant lenses exceed ANSI Z87.1-2003+ and U.S. Military .22 caliber ballistic impact test MIL-V-43511C
- 100 % UVA / UVB protection
