

NOWAR Operational Gloves – Model Anticut

A closefitting operational glove made of high quality leather with an integrated glove inside of 100 % spectra – therefore this glove is cut retardant against knife attacks.

1965, the company DuPont developed an aramid fibre which is further developed and called Spectra, but is well known on the market under the brand Kevlar. During the production it must be considered that there are special micro-teethed cutting tools are necessary for the cutting of aramid fibres. The cut retardant feature of spectra materials is therefore suitable at best for operational gloves, especially if the wearer of gloves have to expect knife attacks.

Material	- Leather - Spectra
Colour	- Black
Size key	- Size S = 01 - Size M = 02 - Size L = 03 - Size XL = 04 - Size XXL = 05
Article-No.	- 01202
Note	- Please specify the size as example below when ordering: 0120204 = Size XL (The first 5 digits means the main article no., the two last digits specifies the size).
