

NOWAR Operation Glove – Model Special Force

This multi-purpose glove combines the advantages of several different gloves in one model. The four separate pit-iron sand paddings provide it with a high break-down power and a good protection effect, as it is known by our Model Tactical Glove. The cut retardant lining Spectra is taken over from our Model Anticut. The back of the hand is made of fire resistant Nomex. Therefore, a good air circulation is ensured. The very soft leather used for the palm is sewed up with an extreme anti-slip and abrasion-proofed fabric. So the “Fast-Roping” is also no problem with this glove. The adjustable loop at the wrist offers a good fit and avoids the incoming of foreign objects.
