

NOWAR Police Riot Helmet – Model NP16

The product was developed for protecting the head from non ballistic attacks. The helmet ensures perfect safety from thrown or hurled stone, iron and wood pieces, furthermore burning objects and spattering liquids. The helmet shell, moulded from high grade thermoplastic (LEXAN ML 3400) for impact and penetration strength combined with lightness. A foldable visor infinitely adjustable and designed to protect the user's face. The design of the shell offers a large area of protection for the user especially even for the sides and the neck area, without hindering the flexibility of head-movements or reducing the field of vision. All exterior parts are chemical resistant, corrosion resistant and non-flammable.

The interior liner constructed for comfort of the user and designed to provide protection to impact and penetration performance requirements. A special channel ventilation system allows the air to flow freely on the inside and thus ensures a pleasant and comfortable aeration.
