

## ops-core® FAST – Bump Helmet

ops-core® manufacture cutting-edge products and components integral to equipment used by the military and sporting goods industries. The human brain, eyes and ears are highly evolved to sense and react instantaneously. Yet with the advent of new technologies to enhance these senses and increase awareness, today's soldier has been burdened by an excessive amount of equipment to carry on the head. Traditional military helmets were never intended for this purpose and therefore provide a "solution" that is uncomfortable, unstable and often compromises the very senses it is trying to protect.

The ops-core® FAST bump helmet has a carbon fiber shell and is ideal for operations, fast roping, climbing and training. The shell is identical to the ballistic version, that means, the helmet is designed with the structural integrity to comfortably support binocular style NVDs. FAST helmets are lightweight, multi-impact, has ventilated liner with repositionable EPP impact pads and LDV closed-cell comfort foam that is not affected by temperature, altitude or moisture. The integrated Head-Loc chinstrap retention system gives helmet 4x more stability than standard issue ACH helmet suspension / retention products. FAST helmets comes with standard MARSOC / WARCOC 3-hole pattern and allows to mount the ops-core® VAS Shroud (sold separately), so the helmets are compatible with front mount visors, flashlights and other visual enhancement devices.

### Sizes

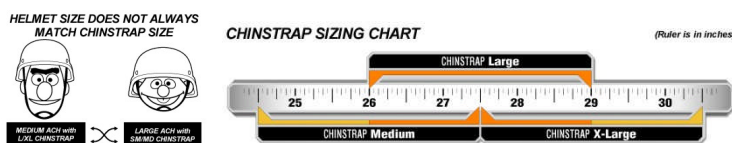

- Head Sizing Chart:	S/M	M/L	L/XL
Head Circumferences (cm)	53 – 56	56 – 59	59 – 61
Head Circumferences (in)	21 – 22 1/8	22 1/8 – 23 3/8	23 3/8 – 24
Head Size (US)	up to 7	up to 7 3/8	up to 7 5/8

### - Chinstrap Sizing Guide:

If you require a different size chinstrap than the one that comes with the FAST Helmet (listed below), please specify this when placing your order.

Helmet Size:	S/M	M/L	L/XL	Custom Order
Chinstrap:	M (24.5-27.5")	M (24.5-27.5")	L (26-29")	XL (27.5-30.5")

Since people have different shaped heads, helmet size (the size of the top of your head) is not always proportional to the chinstrap size (the size of your face).

### Weight

- As shown in photos, incl. VAS Shroud and rails	S/M 1.41 lbs (638 g)	M/L 1.50 lbs (682 g)	L/XL 1.64 lbs (744 g)
