

### 3-D Targets – Skull, water fillable

With water or gel fillable skulls are ideal for shelling attempts. When filling, the skull has in shape, size and weight the same dimensions as an original head of an adult human.

Especially for forensic expertises the skull can bring valuable cognitions. Furthermore, the skull is optimal for shooting training of snipers and for training purposes.

<b>Material</b>	- Solid foam
<b>Dimensions</b>	- Width: 153 mm - Length: 191 mm - Height: 140 mm
<b>Article-No.</b>	- <b>2500601</b> <b>3D-Target – Skull water fillable</b>
<b>Note</b>	- Other Models (e. g. skull with mandible, complete skeleton or individual parts of the body) are available on request.
