

McQueen – 3-D Foam Targets

Designed and manufactured in reairable foam to provide realistic, low cost, humanoid shoot / no shoot scenarios. Bendable forearms, hands and fingers to grip objects. Upper arm swivels and head rotates in sockets. Torso height is designed for sitting adequately into motor vehicles, aircraft seats, furniture etc.

The faces of targets can be altered by adding earrings etc, or using felt tip pens to draw on scars, moustaches, nail varnish for fingers etc.

Targets manufactured in 4 pieces, head, common torso and common left and right arms. Replacements can be purchased separately. Torso base has 2 circular sockets to suit 68mm bore plastic drain pipe for „legs” if required, also central square socket for wooden stake. Wide range of foam accessories available, also useable for teaching disarming techniques.
