

FWS – Components – Barrel Saddle for vertical storage

The fully adjustable Weapon Storage Components are the key to the flexibility of the FWS system whether used in a Police or Military Armoury, as part of a mobile operations unit, or for evidence storage. The components can be positioned in any location on the storage system back panels. They are securely fixed into position using a single fixing for fast changes when required using a single tool.

This permits both high-density storage of single weapon types and, or, a diverse mixture of weapon types on a single Cabinet or Rack – with or without accessories such as scopes. Instant adjustability provides the most flexible solution available to meet any operational requirement.

For police evidence storage, the flexibility provided by the adjustable components enable the highest density storage of diverse types and sizes of evidence such as pistols, shotguns, rifles etc. as well as other weapons such as knives all within a single cabinet or rack.

Barrel Saddle standard	<ul style="list-style-type: none"> - capacity: 1, 5 or 6 barrels - Depth: 5.5" / 139 mm or 7.0" / 178 mm
Double Wide Barrel Saddle	<ul style="list-style-type: none"> - For storage of machine guns which are often used with a bipod - the Double Space Saddle enables the additional width of the bipod to be accommodated on the gun storage rack.
Pad Lockable Barrel Saddle	<ul style="list-style-type: none"> - Enables weapons to be locked into the Secure Weapons Cabinet, Stackable Rack, or Expandable Rack. The standard rubber-lined U shaped barrel saddle is fitted with a hinged flap which is lowered over the barrel and padlocked shut (1 or 2 padlocks as required). Removal of the weapon is restricted to key holders which enables total control over access.
Seismic Barrel Saddle	<ul style="list-style-type: none"> - This component is ideal for securing weapons during transportation or in areas prone to seismic activity. - Also available for Extended Barrel Saddles or for Double Wide Barrel Saddles.
Extended Barrel Saddle	<ul style="list-style-type: none"> - Vertical extended Barrel Saddle
