

## FWS – Components – Miscellaneous Components

The fully adjustable Weapon Storage Components are the key to the flexibility of the FWS system whether used in a Police or Military Armoury, as part of a mobile operations unit, or for evidence storage. The components can be positioned in any location on the storage system back panels. They are securely fixed into position using a single fixing for fast changes when required using a single tool.

This permits both high-density storage of single weapon types and, or, a diverse mixture of weapon types on a single Cabinet or Rack – with or without accessories such as scopes. Instant adjustability provides the most flexible solution available to meet any operational requirement.

For police evidence storage, the flexibility provided by the adjustable components enable the highest density storage of diverse types and sizes of evidence such as pistols, shotguns, rifles etc. as well as other weapons such as knives all within a single cabinet or rack.

<b>Lockable Storage Box</b>	- 6.25"W (158mm) x 6.875"H (174mm) x 11"D (279mm)
<b>Vest Holder</b>	- Capacity: 3 vests
