

FWS – Expandable Weapons Racks

Efficient, flexible weapons storage for armoury locations - with instant expandability built in the Expandable Weapons Rack enables high-density storage of virtually any small arms within a secure space such as a military or police armoury.

Whatever operational requirements may dictate, users can configure their weapons storage to match - seamlessly and efficiently.

This system reduces weapons deployment time and can be rapidly reconfigured to meet changing requirements and armoury equipment using just a single tool. Simple and straightforward to use, the arms storage system can grow or change with requirements by adding or removing bolt-on modules.

Module Dims	- Widths: 810 mm or 1020 mm - Height: 2135 mm
Material	- All punched steel
Construction	- Modular components See our datasheet „FWS – Components“
Key Benefits	- House any size weapon Carbines, assault rifles, shotguns, sniper rifles, handguns, hardware, accessories and ammunition - Rapid deployment is enabled by permitting storage of rifles with accessories such as scopes & grenade launchers attached - Store weapons vertically or horizontally - Double or single sided units are standard
