

FWS – Grenade Launcher Storage Rack

FWS provides unique solutions for storage of these weapons - from small Under Barrel Grenade Launchers (UBGL) and other single-shot weapons such as the HK69, through to RPG-type GLs and automatic MGL / MSGL, GMG.

We offer a highly convenient and flexible system for Grenade Launcher storage – easily used both inside the armoury and for mobile applications.

Storage racks can be supplied dedicated for Grenade Launchers or integrated with storage of other equipment.

Our specialist drawing office team can assist with any weapon storage facility layout and space-planning issues using 3D CAD software.

<p>Static or Mobile GL Storage</p>	<ul style="list-style-type: none"> - For static use, we offer grenade launcher storage on either open racking or inside lockable racks. Racks can be single sided for wall mounted or double sided for storage with aisles. - For use in the field, GL storage can be installed into land vehicles or mobile (container-based) armouries, aircraft and ships. Alternatively, storage racks can be mounted to specially designed fork-lift truck bases for easy-loading to transport aircraft and vehicles.
<p>Open Racking or Lockable Racks</p>	<ul style="list-style-type: none"> - Grenade Launchers can be stored using specially designed components on open Expandable Weapons Racks or in locking Stackable Weapons Racks. - Highly flexible storage comes as standard – for instance, different types of Grenade Launchers can be stored together side by side. In addition, GLs can be stored right alongside other equipment such as assault rifles, pistols etc. when required.
<p>Key Benefits</p>	<ul style="list-style-type: none"> - Safe, damage-free storage saves unnecessary maintenance - Space saving with high density storage - Easy inventory
