

## FWS – Weapons Racking installed on Mobile Carriages

Providing the highest density weapon storage available. Our system offers the highest density storage available for all types of firearms - from pistols to machine guns and grenade launchers. Mobile racking allows you to get even more from your existing armoury locations.

### Key Benefits

- Double your storage capacity – get more from existing facilities
- Create space in the secure area of the armoury to provide storage for ammunition, explosives and valuable equipment, or workspace for personnel
- Avoid expensive relocations and the construction costs of new armoury or storage facilities

Imagine what happens when the highest density weapon storage system is mounted onto mobile carriages. All the space previously allocated to aisles and walkways is converted to storage – so the quantity of weapons which can be stored in any given area is doubled.

<b>Double the storage capacity your armoury</b>	<ul style="list-style-type: none"> <li>- All our standard products can be fitted to our roller racking system to provide previously unattainably high levels of storage density for all types of firearms.</li> <li>- Mobile Racking works by eliminating all the space previously set aside to give access to static racking – that’s all the aisles and walkways.</li> </ul>
<b>Eliminate the need to relocate expensive armoury facilities</b>	<ul style="list-style-type: none"> <li>- Armouries are by their nature very expensive facilities, so getting more from existing locations can enable great cost savings as well as avoiding disruption to day to day firearms operations.</li> <li>- The cost of relocating an existing armoury which is full of weapons and equipment can be completely avoided by using our mobile racking system.</li> </ul>
<b>Easy to use</b>	<ul style="list-style-type: none"> <li>- A Push-to-Lock safety button on the handle immobilises the carriage to prevent accidental closure on other users.</li> </ul>
<b>Installation</b>	<ul style="list-style-type: none"> <li>- The FWS installation team travels to virtually any location around the world to carry out installations of weapon storage racking and mobile carriage systems. Their expertise enables quick and accurate installation with minimum disruption. Alternatively, FWS personnel can operate as project managers for your own staff on site.</li> </ul>
