

FWS – Stackable Weapons Racks

Modular Secure Stackable Weapons Rack enables high-density storage of arms in flexible, stackable format. Stores all but the largest weapons along with accessories. Internal design permits storage for scopes and other accessories attached for rapid deployment if required.

Internal layout can be quickly altered to meet police operational requirements and the stacking units themselves can quickly be broken down and repositioned as required. All components are interchangeable with the Secure Cabinet and Expandable Weapons Rack.

Minimise footprint by stacking side-to-side, on top or back-to-back. Wall or floor fixing enables best use of available armoury space. The weapon racks are only 380mm deep so can be located anywhere space is at a premium.

Module Dims	<ul style="list-style-type: none"> - Widths: 356 mm or 1066 mm - Depths: 381 mm - Height: 1219 mm or 1638 mm
Material	- All punched steel
Construction	- Modular components See our datasheet „FWS – Components“
